

LARGE SURFACE AWNING

WINGLINE
WINGLIGHT COMPACT
WINGLIGHT SOLID

FOR THAT EXTRA BIT OF SHADE

WINGLINE

Freestanding, double-sided jointed arm awning which extends simultaneously to both sides and can shade areas of up to 58 m².

WINGLIGHT COMPACT

Freestanding, double-sided jointed arm awning which extends in synch to both sides and can shade areas of up to 38 m².

WINGLIGHT SOLID

Freestanding, double-sided jointed arm awning which extends asynchronously to both sides and can shade areas of up to 49 m².

ADVANTAGES

UNBRIDLED INDEPENDENCE

Relaxing in the cool shade on a sunny day exactly where you want to: by the pool, at the barbecue or on your patio – not a problem thanks to our freestanding large-surface jointed arm awnings. This shading solution is mounted on two upright posts anchored to a fixed substrate, enabling more flexibility on installation. The best thing of all is that the wide range of high-quality fabrics and frame colours available will let you enhance the look of your garden at the same time.

Protect yourself from the sun, heat and prying eyes with our freestanding awning – positioned just where you want it to be. Manufactured in Austria, tailored to your requirements and made to the highest quality standards to guarantee your lasting enjoyment.

A RANGE OF MOUNTING OPTIONS

You have various mounting options depending on your chosen model. The WINGLINE, for instance, with its galvanised and powder-coated steel support, can be screwed into the substrate using a base plate. The WINGLIGHT, meanwhile, offers no fewer than three mounting options: using a ground sleeve, a cantilever foot or a flanged plate screwed into the substrate.

FIVE- OR SEVEN-YEAR WARRANTY

Just like all our awnings, the WINGLINE and WINGLIGHT series are CE-tested. High-quality and corrosion-resistant materials and coatings guarantee you a durable product which will enable you to enjoy every ray of sunshine.

OPERATING OPTIONS

Choose between wired motor, radio-controlled motor or the Somfy io homecontrol* radio-controlled motor, which allows seamless integration into a smart home system. Increase your comfort with a wind sensor and/or sun sensor.

230 V Motor

Smart Home

HIGHLIGHTS AND ACCESSORIES

SMART HOME

Products from **wOUNDwo** can be installed flexibly and are compatible with a wide range of smart home systems – whether completely automated or operated via smartphone or remote control.

WIND, LIGHT AND RAIN SENSOR

If limits for wind strength and light intensity are exceeded or fallen below, your product will automatically retract or extend. You can also control the reaction to rain – make your sun protection smart!

RADIANT HEATING UNIT

On those cooler evenings, crank up the warmth with our stylish, high-performance infrared radiant heating units, which are attached either to the product or to the façade. Control your heating along with your shading system, by remote control!

STRONG ARMS

An excellent mechanism is particularly important for the reliability and durability of an awning. All **WOUNDWO** jointed arm awnings are well-engineered quality products with extremely strong arms. The jointed arm on the **WINGLINE** is equipped with a four-pulley system, while the **WINGLIGHT** series comes with a multiflex power belt and a double spring mechanism. These have undergone testing amounting to 70,000 guaranteed movement sequences and can withstand extreme loads.

VARIOVOLANT / VARIOMOTION

A Variovolant is an additional valence on the front of the awning which can be extended vertically up to 1500 mm. The Variomotion is a vario valance (max. 1,350 mm) that is powered by a 24 V electric drive and that can be operated comfortably and ultra-quietly on the **WINGLINE** series via radio control. The **WINGLIGHT** can be operated using a hand crank.

LIGHTVIEW LIGHT STRIP SYSTEM

WINGLINE

Do you want more light on the patio? With our Lightview lighting system, no problem. A continuous light strip in naturally anodised aluminium profile brings up to 720 lumens of dimmable light per metre to your patio at the touch of a button. Better still: once fitted, the lighting strip can be rotated through +/- 45°.

WINGLIGHT COMPACT

LED light strip in upright posts. You can attach the strip either on the inside or outside of the upright posts or even at all four of their corners.

With the **WINGLIGHT SOLID**, the support tube profile and the optional inspection profile can also be fitted with LEDs. This gives you the freedom to choose the perfect arrangement and position your lights entirely to suit your needs.

COLOURS DESIGNS AND FABRICS

DESIGNS AND FABRICS

With a trained specialist dealer, take a look at the **WOUNDWO** collection and embark on a voyage of discovery – explore the range of colours, designs in plain colours, multi stripes and block stripes, and fabrics including acrylic and polyester.

UV PROTECTION

Acrylic fabrics are high-quality awning fabrics which are equipped with a range of extras to make them ideal for demanding outdoor applications. The UV protection of the fabrics according to UV Standard 801 ranges from factor 40 to 80.

TEXGARD – EASY-CLEAN

Due to a special textile finishing, these fabrics have particularly useful properties. These include low soiling tendency, high water resistance and a reduced surface tension. Due to the special way of fixing the material, this effect is maintained for an extraordinarily long time. This provides the best possible protection against water penetration, damp and dirt.

LUMERA ALL-WEATHER

The All-Weather quality is reflected in a fabric manufactured from spun-dyed brand name acrylic and coated on one side. This combines optimal sun protection with protection from drizzle or light rain (inclination at least 14°).

OEKO-TEX STANDARD 100

The Oeko-Tex Standard 100 is a testing and certification system which assures you that the textile products comply with the limit values for certain harmful pollutants.

FRAME COLOURS

With over 200 RAL frame colours and more than 350 fabrics, you can find your favourite awning at **WOUNDWO** – however unusual your requirements! There's a perfect awning model for virtually all dimensions and styles.

VALANCE SHAPES

It's not just a question of choosing the awning fabric – you need to decide how the valance should look too. You have the choice of 6 different shapes and a wide range of colours for the edging strips.

WINGLINE

LARGE SURFACE AWNING
 Material in closed awning
 Max. width 7,000 mm
 (Indefinitely extendable)
 Max. projection 2 x 4,500 mm

WINGLINE is a free standing, double sided jointed arm awning that opens synchronically to both sides. It can cover up surfaces of up to 58 m². Its base is a central, sturdy mounting tube measuring 80 x 80 mm, to which two pairs of jointed arms are attached on opposite sides using special arm holders. The protective canopy consists of a 3-part extruded aluminium profile and is screwed onto the cast aluminium side panels. The entire awning is supported by two steel uprights, which are bolted into the sub-surface using outsized baseplates.

THE BENEFITS TO YOU

- 7-year guarantee
- Awning fabric retracts fully into the cassette
- Standard io homecontrol radio motor
- smart control optional
- Optional Variovolant
- Optional LED light strip
- Infrared radiant heating unit as accessory
- over 200 RAL colours and more than 350 fabrics
- Fabrics weatherproof, dirt-repellent and light-fast
- good wind stability

OPERATION

VARIO VALANCE

This additional awning fabric is integrated into the fall profile of jointed arm awnings. Whether motorised or equipped with a crank, Variovolant provides the ideal protection from low sun.

STEEL UPRIGHTS

The whole awning is supported by two steel pillars that feature a large base plate which is firmly bolted to any solid ground.

WINGLIGHT COMPACT

The WINGLIGHT COMPACT is a free-standing, double-sided jointed arm awning with one central roller tube and one motor drive, meaning that the awning fabrics extend in synch on both sides. The entire double-sided jointed arm awning is supported by two solid aluminium upright posts, which are bolted into the substrate using cantilever feet. The maximum shading area is 38,5 m²

THE BENEFITS TO YOU

- 5-year guarantee
- 1 Roller tube, 1 motor
- Fixing with cantilever feet, flanged plates or ground sleeves
- Ballast box
- Awning fabric retracts fully into the cassette
- Standard io homecontrol radio motor
- smart control optional
- Optional Variovalant
- Optional LED light strip in upright posts
- Infrared radiant heating unit as accessory
- over 200 RAL colours and more than 350 fabrics
- Fabrics weatherproof, dirt-repellent and light-fast
- good wind stability

LARGE SURFACE AWNING

Fabric in closed awning
Max. width 5,500 mm
Max. projection 2 x 3,500 mm
Max. height 3,000 mm

VARIO VALANCE

This additional awning fabric is integrated into the fall profile of jointed arm awnings. Whether motorised or equipped with a crank, Variovalant provides the ideal protection from low sun.

Ground sleeve

Cantilever foot

Flanged plate

INSTALLATION VARIANTS

Standard version with cantilever feet, can alternatively be fixed to the substrate with either two flanged plates or two ground sleeves

BALLAST BOX

This installation option creates a secure and stable base for the WINGLIGHT COMPACT and WINGLIGHT SOLID, without the need for complex and expensive foundation work.

WINGLIGHT SOLID

LARGE SURFACE AWNING
Fabric in closed awning
Max. width 7,000 mm
Max. projection 2 x 3,500 mm
Max. height 3,250 mm

VARIO VALANCE
This additional awning fabric is integrated into the fall profile of jointed arm awnings. Whether motorised or equipped with a crank, Variovalant provides the ideal protection from low sun.

INSTALLATION VARIANTS
Standard version with flanged plates, can alternatively be fixed to the substrate with either cantilever feet or ground sleeves

BALLAST BOX
This installation option creates a secure and stable base for the WINGLIGHT COMPACT and WINGLIGHT SOLID, without the need for complex and expensive foundation work.

The WINGLIGHT SOLID is a free-standing, double-sided jointed arm awning with two roller tubes and two motor drives, enabling the two sides of the awning to be operated individually and the awning fabrics to be extended separately. The entire double-sided jointed arm awning is supported by two solid aluminium upright posts, which are bolted into the substrate using flanged plates. The maximum shading area is 49 m².

THE BENEFITS TO YOU

- 5-year guarantee
- 2 Roller tubes, 2 motors
- Fixing with flanged plates, cantilever feet or ground sleeves
- Ballast box
- Awning fabric retracts fully into the cassette
- Standard io homecontrol radio motor
- smart control optional
- Optional Variovalant
- Optional LED light strip in upright posts, support tube and inspection profile
